CURRICULUM: ACCP AI

SEMESTER: DISM

FACULTY: Sir Tasbeel Jawed

CERTIFICATE OF RECOGNITION

This certificate is proudly presented to the creators of the Smart**CARE**
Website for their outstanding contribution and innovative approach in the field
of **Digital Healthcare and Medical Technology**.

The recognition of the SmartCARE Website refers to an acknowledgment of the team's achievements and efforts in developing a platform that promotes easy access to medical services through online doctor appointments.

This project demonstrates excellence in design, functionality, and teamwork, contributing significantly to the modernization of healthcare through digital means. This recognition serves as a testament to the hard work, dedication, and creativity of the development team and highlights their role in advancing digital health.

Presented On: 15-jan-2026 **Authorized Personality:** Sir Tasbeel Jawed

ACKNOWLEDGEMENT

We would like to express our deepest gratitude to all those who contributed to the successful completion of our project, **SmartCARE Website**.

Our heartfelt thanks go to **Sir** for his continuous guidance, valuable feedback, and encouragement throughout the development of this project. His expertise and support have been instrumental in helping us achieve our objectives.

We are also thankful to our faculty members for providing us with the learning environment, technical knowledge, and motivation needed to complete this project effectively.

A special note of appreciation goes to our team members for their hard work, cooperation, and dedication. Their collective efforts, creativity, and problem-solving skills played a vital role in bringing this system to life.

Finally, we thank our families and everyone who directly or indirectly supported us. This project would not have been possible without their contribution and encouragement.

SYNOPSIS

The **SmartCARE Website** is a web-based platform designed to provide users with convenient, efficient, and digital access to healthcare services. The system aims to eliminate

the traditional barriers of physical hospital visits for inquiries by offering an easily accessible online alternative for patients and doctors.

The main objective of the project is to create a centralized medical portal that allows users to search for specialist doctors, check availability, and book appointments from anywhere, at any time. The system provides an intuitive interface for three roles: **Administrators** (who manage the database), **Doctors** (who manage schedules), and **Patients** (who book services).

The system is developed using modern web technologies to ensure security and performance. Key features include:

- User registration and secure login authentication.
 - Doctor search by City and Specialization.
 - Online appointment booking and status tracking.
 - Admin control panel for managing doctors, patients, and cities.
 - Medical news updates and disease prevention information.
-

CATEGORIES:

The **SmartCARE** Website organizes medical services into well-defined categories to make it easier for patients to find the right specialist. Some of the main categories include:

- **Cardiology** (Heart Specialists)
- **Pediatrics** (Child Specialists)
- **Neurology** (Brain & Nerve Specialists)
- **Dermatology** (Skin Specialists)
- **Orthopedics** (Bone Specialists)
- **General Physician** (Common Health Issues)

DISTRIBUTION:

The SmartCARE Medical Website distributes medical services digitally through a secure platform. Registered patients can browse doctor profiles and book appointments directly through the interface. All appointment details and medical information are distributed and stored securely in the database, ensuring that both doctors and patients have real-time access to schedules and medical news updates

PROBLEM STATEMENT:

In the modern digital era, visiting a doctor is a common requirement, but patients are often required to physically visit clinics just to inquire about availability. This results in long waiting times and inconvenience. The **SmartCARE Website** aims to overcome these limitations by developing a digital platform that allows users to search for specialist doctors and book appointments online from anywhere. The project's goal is to promote digital healthcare and easy accessibility for patients and doctors.

REQUIREMENT SPECIFICATION:

Home Page:

- Displays system introduction and navigation menu
- Provides access to login, registration, and doctor search

User Registration & Login

- Patients and doctors can register and log in securely
- Unique user ID for each user

Doctor Search

- Patients can search doctors by city and specialization

Appointment Booking

- Patients can check doctor availability and book appointments

Profile Management

- Doctors and patients can update personal information

Admin Dashboard

- Manage doctors, patients, cities, and system content

USER ROLE:

Administrator

The Administrator can:

- Add, update, and delete cities
- Add, update, and delete doctors
- Manage patient records
- Create and manage user accounts
- Update website content

Doctor

The Doctor can:

- Log in securely
- View and update profile information
- Manage availability (daily, weekly, monthly)
- View scheduled appointments

Patient

The Patient can:

- Register and create an account
- Search doctors by city and specialization
- Book appointments online

Mandatory Information

The following details are required during registration or profile creation:

- Name
- Address
- Phone Number
- Email ID

CONTACT

DATABASE OVERVIEW

THE DATABASE STORES INFORMATION RELATED TO:

- DOCTORS
- PATIENTS
- CITIES
- APPOINTMENTS
- LOGIN CREDENTIALS

ALL DATA IS SECURELY MANAGED USING AUTHENTICATION AND AUTHORIZATION MECHANISMS.

CONCLUSION

THE CARE GROUP MEDICAL WEBSITE PROVIDES AN EFFICIENT AND USER-FRIENDLY SOLUTION FOR HEALTHCARE MANAGEMENT. BY ENABLING ONLINE DOCTOR SEARCH AND APPOINTMENT BOOKING, THE SYSTEM SAVES TIME, REDUCES WORKLOAD, AND IMPROVES HEALTHCARE ACCESSIBILITY FOR PATIENTS AND MEDICAL PROFESSION.
